DETAILED ACTION

Claims 1-38 are pending in the instant application.

Election/Restrictions

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Due to the numerous variables in the claims, e.g. M, L, T1, A, etc... and their widely divergent meanings, a precise listing of inventive groups cannot be made. The following groups are exemplary:

Group I, claim(s) 1-24 (in part), 27-31, 33 (in part), and 36-38 drawn to the compound, process for making, and use of the compound of Formula IVa.

Group II, claim(s) 1-7, 9-24, and 33, (all in part), drawn to the compound, process for making, and use of the compound of Formula IVb.

Group III, claim(s) 1-7, 9-24, and 33, (all in part), drawn to the compound, process for making, and use of the compound of Formula IVc.

Group IV, claim(s) 1-7, 9-22, 25-26, and 33, (all in part), drawn to the compound, process for making, and use of the compound of Formula IVd.

Group V, claim(s) 32 and 24-25 (in part), drawn to the compound of Formula IIIa and its use.

Group VI, claim(s) 32 and 24-25 (in part), drawn to the compound of Formula IIIb and its use.

Group VII, claim(s) 32 and 24-25 (in part), drawn to the compound of Formula IIIc and its use.

Art Unit: 1626

Group VIII, claim(s) 32 and 24-25 (in part), drawn to the compound of Formula IIIId and its use.

In accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, **this list is not exhausted**, as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, Applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and Examiner will endeavor to group the same. **If Applicant is unable to elect a single invention, Applicant may instead choose to elect a specific compound and Examiner will attempt to group it.** The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain a common structural formula: $ML_{T1}A_{T2}COO^-$. Since $ML_{T1}A_{T2}$ can have vastly different meanings, there is no discernable special technical feature of the inventions as a whole. Therefore, unity of invention is lacking. Additionally, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter. The method of preparation claims will be examined with the elected invention commensurate in scope therewith.

Art Unit: 1626

A telephone call was made to Amy Schoenhard on September 5, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Kosack whose telephone number is (571)-272-5575. The examiner can normally be reached on M-F 5:30 A.M. until 2:00 P.M.
